## SUMMARY

Business Administration graduate serving as the operational link between a national education institute and 16 regional education departments. Pair business planning and process improvement with hands-on data and systems work — a leadership database, an ADKAR change-management platform the center uses to manage change with 80+ leaders, and operational tools for national-level events.

## SELECTED PROJECTS

### ADKAR Change Management Platform — NIEPD

2026

*Product Owner & Developer*

- Delivered a single-file, offline web application (1.55 MB — no server, database or cloud service) for a government environment that prohibits deployed services; the team syncs through a shared folder with cell-level timestamp merging and user-resolved conflicts.
- Automated official correspondence: one letter is issued in 16 personalized copies, with salutation and title derived from the approved protocol guide (10 ranks) and checked against 24 rules — 1.9 seconds and 4 clicks to a package of 16 Word letters.
- Engineering quality: 33,400 source lines, 870 unit tests, 46 browser tests, an 11-stage CI gate, 150 documented architecture decisions and zero WCAG 2.1 AA violations; team merge time cut 14.9x (3,905 ms → 258 ms).
- Built as a reusable template: identity, units, levels and engine rules are configured through a JSON package and a six-step wizard, with nothing hard-coded. Developed with an AI coding agent (Claude Code); owned the architecture, domain modeling, review and decision documentation.

### NIEPD Seating System — Jusoor Forum

2026

*Designer & Developer*

- Built a single-file browser tool that turns a photo of the hall into a working seating model: one-click sampling of the chair colour detects the seats, rows and zones are drawn over the image, and attendees are placed by drag-and-drop or auto-assigned from a pasted list.
- Produces printable seating charts and personalized name cards — multiple layouts, a logo library with automatic monochrome/colour handling, and a preview that maps a card onto a photo of the actual chair; reads iPhone HEIC images and saves the model to one file.

## EXPERIENCE

### Administrative Development Specialist (Tamheer Program)

July 2026 – Present

*Center for Educational Leadership Development — National Institute for Educational Professional Development (NIEPD)*

- Serve as the focal point between the institute and 16 regional education departments, coordinating with senior leadership and following up on cross-departmental initiatives.
- Built a centralized leadership database within the first week — 16 departments and 80+ administrative roles (directors general, office managers, assistants) — published as a password-protected internal HTML site.
- Designed and developed the center's ADKAR change-management platform (above), which the center uses to run the change program across 16 departments, 80+ leaders and ~20,000 schools.
- Analyzed and segmented records for ~4,000 individuals to drive targeted SMS and email reminder campaigns.
- Served on the organizing team for the first Jusoor Forum (September 2026, with UCL as international partner): coded and packaged the submitted practices for blind judging, and delivered attendee seating, name cards and stage readiness on the day.
- Redeveloped standardized work forms and templates, and handle meeting scheduling, official and invitation letters, and executive summaries with action items for leadership follow-up.

## ACADEMIC PROJECTS

### Economic Feasibility Study: Riyadh Crusher

Qassim University

- Projected a Net Present Value of 1,432,486 SAR at a 5.4% discount rate, an Internal Rate of Return of 62.5% and a 2.5-year payback period, with operational and marketing strategies and mitigations for financial, operational and environmental risks.

## Research Seminar: Role of Accounting Information Systems in Decision Making

Qassim University

- Analyzed survey data from 94 employees using SPSS, concluding that AIS dimensions significantly improve evaluation of alternatives and administrative decision accuracy.

## EDUCATION

---

### Bachelor of Business Administration — Qassim University

2022 – 2026

Key coursework: Business Planning, Statistical Analysis (SPSS), Optimization & Decision Modeling (LINDO), MIS, Operations Management.

## SKILLS

---

**Technical:** Excel, Word & PowerPoint (Advanced), Access, SPSS, LINDO, HTML/CSS/JavaScript, JSON, AI-assisted development (Claude Code).

**Professional:** Change Management (ADKAR), Process Improvement, Business Process Automation, Data Analysis & Segmentation, Event Operations, Feasibility Analysis, Official Correspondence & Government Protocol, Working Under Pressure, Adaptability.

## CERTIFICATIONS, LANGUAGES & LINKS

**Certifications:** PMP Preparation Course (35 PDUs) — PM TRICKS; Principles of AI — SDAIA; IBM Customer-Focused Communication.

**Languages:** Arabic (Native) • English (Professional) | **Recommendations:** [Google Drive folder](#)
